Outline

- American Community Survey basics
- Resources for learning more
- Accessing ACS data products

What is the ACS?

A large, continuous survey that:

- samples approximately 3.54 million resident addresses per year (about 290,000 per month)
- produces characteristics of population and housing (similar to Census 2000 long form)
- produces estimates for small areas and small population groups

THE American Community Survey

This booklet shows the content of the American Community Survey questionnaire.

Please complete this form and return it as soon as possible after receiving it in the mail.

This form asks for information about the people who are living or staying at the address on the mailing label and about the house, apartment, or mobile home located at the address of the mailing label.

Start Here

1. Write the household's name.
2. Write the date and telephone number of the person who is filling out this form. See the mailing label for more information.
3. Write the date and telephone number of the person who is filling out this form. See the mailing label for more information.
4. Write the date and telephone number of the person who is filling out this form. See the mailing label for more information.
5. Write the date and telephone number of the person who is filling out this form. See the mailing label for more information.

ACS Estimates Are NOT the 2010 Census Population Counts

- The 2010 Census **counts the population** to support apportionment and redistricting
- The ACS supplements this information with annually updated **estimates** on the nation's **population and housing characteristics**
- The purpose of the ACS is not to count every person in a community or town but rather, to provide a portrait of the community's characteristics

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, for 2010, the 2010 Census provides the [official counts of the population and housing units for the nation, states, counties, cities and towns](#). For 2008 to 2009, the Population Estimates Program provides [intercensal estimates of the population for the nation, states, and counties](#).
